SUMMARY

Senior Frontend Engineer with 7+ years of experience building robust, scalable web apps using React, Angular, and TypeScript. Proven experience in crafting intuitive user interfaces, cross-functional collaboration, and incorporating modern tools and AI-assisted workflows to enhance productivity and code quality. Seeking a senior role to drive impactful frontend solutions.

WORK EXPERIENCE

Butlr - Burlingame, CA

Senior Software Engineer

Feb 2025 - Present

Software Engineer - Front-End

Feb 2023 - Feb 2025

- Architected and maintained core dashboard features and infrastructure using React, Redux, GraphQL, and RTK Query. Collaborated cross-functionally with UX, Product, and key stakeholders to deliver responsive, performant, and well tested functionality in a fast-paced environment.
- Owned and executed a comprehensive and responsive redesign of the customer dashboard and data visualizations, revising the app's architecture and navigation for greater scalability and clarity. Led the technical integration of Highcharts.js and the Ant Design system, resulting in improved data transparency for 100+ corporate clients, up to 80% faster page load times, and a cleaner, more intuitive user experience.
- Redesigned and optimized the API integration layer using Redux and RTK Query, improving data flow, error handling, and loading state management for greater maintainability.
- Managed weekly production releases with GitHub Actions and translated ambiguous feature requests into clear technical requirements to align engineering efforts with user needs and drive product quality.

StormSensor - Seattle, WA

Front-End Engineer

May 2018 - Dec 2022

- Led the design and development of customer apps and internal tools using Angular, React, TypeScript, and SCSS, delivering consistent new features and supporting visualization of 10,000+ data points with optimized performance.
- Engineered a cross-platform mobile app as an internal tool using Ionic and React; led design and coordinated API integration with backend teams. Deployed to the App Store and Google Play.
- Designed and built, and published a reusable component library with 50+ modular components and 100+ custom utility classes, improving UI consistency and accelerating development across multiple projects.
- Served as hiring manager and product owner for university capstone development teams.

TECHNICAL SKILLS

- React • Angular • TypeScript • JavaScript • HTML • CSS • SCSS • Jest • Playwright • Ionic • XCode • Android Studio • PWA • Highcharts.js • D3.js • Redux • RTK Query • REST API • GraphQL • Git • GitHub • Vite • node.js • Figma • Ant Design System • Material UI • Datadog • Jira • Jenkins • Agile/Scrum

EDUCATION

Coding Dojo Software Bootcamp - San Jose, CA

October 2017 - Feb 2018

- Certified proficiency in three full software stacks (Python/Django, Ruby on Rails, and MEAN)
- Won a hackathon for a project using web-sockets to build a web-based piano

California Lutheran University - Thousand Oaks, CA

Aug 2013 - Dec 2016

Bachelor of Arts in Communication (Emphasis in Journalism)

Bachelor of Arts in Music Production

- Dean's List (every semester)
- Graduated Magna Cum Laude
- Member, Lambda Pi Eta (National Communication Honor Society)
